Dr. Youth Selection

AI Smart Plush Module Function Manual

Your drawing, brought to life — a soft companion that chats, remembers and grows with you, at every age.

International Edition · Default language: English · 66 languages supported
For use with the free companion app (Tuya / Smart Life)

Welcome

Thank you for choosing a Dr. Youth Selection smart plush. Every character begins as an original drawing and is hand-finished into a soft, huggable companion with a built-in AI Smart Plush Module. It talks, listens, remembers and reacts — a friend for storytime, playtime, learning and everyday comfort. This manual describes everything the module can do. Setup, Wi-Fi connection and safety instructions are covered in the separate Setup & Connection Guide.

Core Features — Designed for All Ages

These companionship features are available to every user, right out of the box:

- **Chats in 66 Languages**
  Hold natural voice conversations in English, Korean, Japanese, Spanish and 60+ more languages. The international edition defaults to English and switches language automatically or from the app.
- **Stories, Songs & Learning**
  The companion tells bedtime stories, sings sing-along songs, answers curious questions and helps with homework — all through voice, for 100% screen-free entertainment.
- **Mood-Responsive Reactions**
  It picks up on the tone and emotion of a conversation and reacts with expressive LED eyes and comforting, encouraging words.
- **Long-Term Memory**
  It remembers names, shared stories, favourite topics and little preferences, so every conversation feels like continuing a real friendship.
- **Multiple Characters & Roles**
  Switch between companion personalities and roles in the app — a playful storyteller, a patient study buddy or a calm bedtime friend.

- **Voice Cloning**
  With permission, the module can learn a familiar voice (such as a parent or grandparent), so a loved one always feels close by. Voice data is managed through the app and can be deleted at any time.
- **Chat Summaries**
  Conversation recaps are saved in the app, where parents or users can review them at any time.
- **Smart, Safe Hardware**
  1000 mAh rechargeable battery with USB charging, over-the-air (OTA) firmware updates, and a removable AI module — take it out and the plush body is fully washable.

Optional Features — Recommended for Ages 15+

How it works: the features below are switched off by default. They can be enabled or disabled at any time in the companion app, so every family can choose what fits their user. Dr. Youth Selection recommends adult supervision for users under 15 when these features are enabled.

- Life Assistant — Everyday help for older teens and adults: recipe ideas and cooking tips, outfit matching, BMI and fitness guidance, fashion trend updates, and traditional wellness suggestions.
- Mystical & Fun — Light entertainment: daily Chinese-style almanac, lucky fortune draws, dream interpretation, and tarot / horoscope readings — for fun, not for life decisions.
- Music Streaming — Stream music through the companion’s speaker from the app, so it can play your favourite songs anytime.

Technical Specifications

Item	Specification
Smart module	Tuya T5 module, ARM processor @ 400 MHz, 48 GPIO, 2× QSPI, UART; ATOS system
Connectivity	2.4 GHz Wi-Fi (2.4–2.485 GHz). 5 GHz networks are not supported. OTA firmware updates
